Professional Summary

Gameplay Programmer proficient in C#, Python, and JavaScript with expertise in building engaging gameplay mechanics, debugging complex software, and optimizing systems. Published developer of 'Dark Throne' on Steam with experience in modular game design, rapid prototyping, and team collaboration using Unity and libraries like Phaser.js.

Game Development Experience

Steam Game (Dark Throne)

Gameplay Programmer & Lead Developer | Mar 2024 – Jun 2024

- Programmed and published "Dark Throne" on Steam using Unity/C#, focusing on gameplay mechanics and user interaction.
- Debugged and optimized code to ensure smooth performance and engaging gameplay.
- Designed modular gameplay systems and UI, incorporating player feedback to refine user experience.

Browser-Based Games(Where's My Gun? & Pencil Pusher)

Game Developer | Apr 2022 – Jun 2022

- Programmed 2D gameplay features and logic using Phaser.js for browser compatibility.
- Designed game logic, mechanics, and features to create compelling player experiences.
- Debugged game mechanics to ensure responsive design and smooth interaction.

Game Jams (Solo Projects)

Gameplay Programmer & Developer | Various Dates

- Programmed and designed two solo game projects within game jams, developing from concept to playable prototype under strict deadlines.
 - Executed coding, gameplay mechanics, and level design, enhancing rapid prototyping skills.
-

Technical Experience

Online Store Automation Project (Etsy)

Freelance Programmer | Jun 2023 – Feb 2024

- Designed and tested Python scripts to automate product listing workflows, improving efficiency and reducing manual errors.
- Applied API integration techniques to connect Discord, Google Sheets, and Printify, streamlining end-to-end e-commerce operations.
- Conducted rigorous testing to ensure seamless and error-free functionality across multiple platforms.

Robotics Team (FRC Team 199 Deep Blue)

Project Lead & Driver | Sep 2016 – Mar 2020

- Led design and development of competitive robots, coordinating cross-functional teams.
 - Cultivated teamwork, problem-solving, and project management skills through leadership roles and competitions.
-

Education

Bachelor of Science in Game Design

University of California, Santa Cruz | Sep 2020 – Jun 2024

- Specialized in game mechanics, AI behavior, and interactive storytelling.
 - Developed skills in Python, C#, and JavaScript for game development using Unity.
 - Contributed to multiple group projects, enhancing teamwork and communication skills.
-

Skills

- Programming Languages: Python, C#, JavaScript, C++, SQL, Selenium
 - Development Tools: Unity, Unreal Engine, GitHub, Visual Studio, Linux
 - Specializations: Gameplay Programming, Debugging, Systems Optimization
 - Soft Skills: Team Collaboration, Problem Solving, Creativity
-

Achievements & Projects

- Published 'Dark Throne' on Steam: Developed a full 2D game, reaching a global audience with an engaging user experience.
- Game Automation Program: Developed a Python-based automation script to optimize repetitive tasks, showcasing problem-solving and scripting abilities.
- Game Jams Participation: Completed two fully playable solo game projects under strict deadlines.
